## ✓ What is a Microsoft Office Product Key?

A **Microsoft Office product key** is a 25-character code used to activate your copy of Office software, verifying it's legitimate and unlocking full features like Word, Excel, PowerPoint, Outlook, and more.

There are two main types of Office licenses in 2025:

- **Retail keys** – One-time purchase for 1 PC, with lifetime use.
- **Volume keys** – Often misused and not legal for resale. Avoid these.

When buying online, always make sure you're getting a **genuine retail key** with full online activation.
